

Edge offers DPDT momentary polarity reversing rocker switch. Used for all sorts of DC motor reversing applications such as camper trailer jacks, winch controls for in/out operation, door open closed, liftgate up/down....

Features

- DPDT reverse polarity switch controls the up/down, clockwise/counterclockwise motion of DC loads (e.g. motors, hoists, cranes, linear actuators, etc.)
- Enclosed housing for durability and prewired with 12 inches of flexible 14 AWG copper wire
- Heavy duty 25-amp, 250V switch to accommodate larger DC loads.
- Mounting Velcro and 3M tapes are included
