DETACHABLE TWEETER

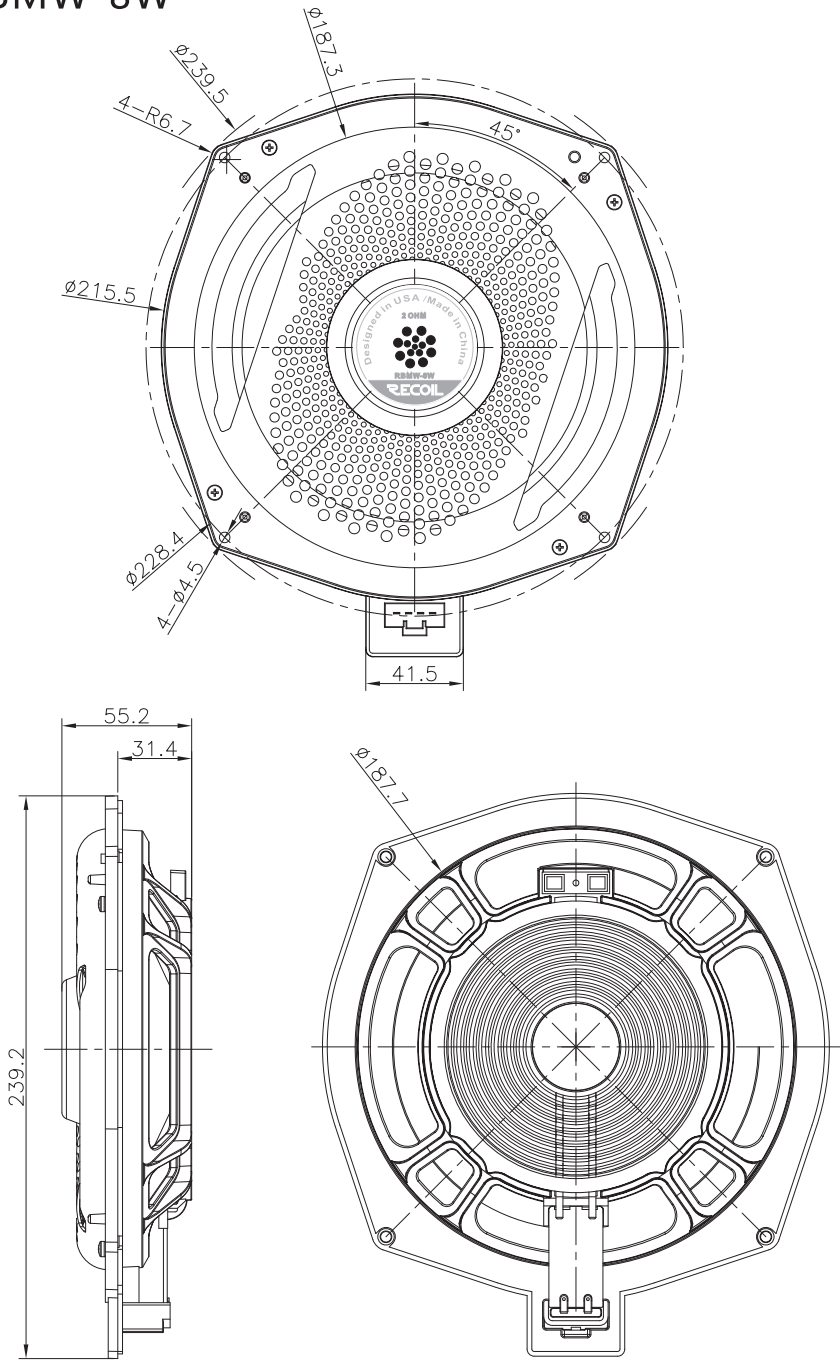

- Our speaker has a collapsible structure between the plastic housing and the speaker, and for some models, plastic housing needs to be removed before they can be installed (such as BMW 7 series).

Tips: when removing the shell, hold the edge of the shell with the left hand (please do not hold it with your fingers, otherwise the left thumb will easily be damaged by high-pitched vibration at the moment of separation).

Use your right hand to pull on the wires that close to the speaker terminal could separate them.
