**Applicant** : AVS(NINGBO) INDUSTRIAL CO.,LTD.

**Address** : 7TH BUILDING, NO.59 CHANUG FU ROAD,XIAO GANG INDUSTRIAL ZONE, NINGBO  
315800, CHINA

(The following sample(s) was (were) submitted and identified by client as)

**Sample Name** : Sound insulation and vibration damping board

**Model/Item No.** : DMBK, PMBK

**Test Period** : From May 12, 2025 to May 16, 2025

**Tests Conducted** : As requested by the applicant, for details refer to attached page(s).

## Executive Summary:

No.	TESTED SAMPLE	STANDARD	CONCLUSION
1	Tested material(s) of submitted sample(s)	As specified by the client, according to REACH Regulation (EC) No.1907/2006, to determine the content of the two hundred and forty-seven Substances of Very High Concern (SVHC) in the submitted sample.	See Remark

Remark: The test result for the concentration of each of 247 SVHC which are in the current candidate list updated on Jan. 21, 2025 in the tested materials of submitted sample was **LESS THAN** 0.1%

## Remark:

1. N.D. = Not Detected (lower than reporting limit) RL = Reporting Limit % = percentage by weight
2. PBT = Persistent, Bio accumulative and Toxic as defined in Regulation (EC) No 1907/2006
3. vPvB = Very persistent and very bio accumulative as defined in Regulation (EC) No 1907/2006
4. If the article contains a material type whose weight is less than 0.1% of the total article weight, this material type is ignored for testing.
5. \* = Result is based on the representative heavy metal concentration. Due to the limit of the analytical technology available, when the calculated result of target substance by chemometrics is higher than the request limit, the client is strongly advised to review the chemical formulation to ascertain.
6. # = The SVHC which is defined as UVCB substance (substances of **U**nknown or **V**ariable composition, **C**omplex reaction products or **B**iological materials) under REACH regulation cannot be sufficiently identified by its chemical composition as the number of constituents is relatively large and/or the composition is, to a significant part, unknown and/or the variability of composition is relatively large or poorly predictable. So the test result is calculated as per the selected identifiers of the SVHC basing on the worst-case scenario.
7. If a SVHC is found over the request limit, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by further request of quantitative analysis.

## Notes:

- 1) The limit of 0.1% (w / w) applies to an article. The test results herein were obtained for the tested materials which come from the articles of the submitted sample, they are not reported as the concentration of SVHC in an individual article. However, the results may not be applicable if the intended use of the sample is a substance or mixture. According to REACH, the definitions of article, substance or mixture are:
  - i Article - An object during production is given a special shape, surface or design which determines its function
  - ii Substance - A chemical element and its compound in the natural state or obtained by any manufacturing
  - iii Mixture (Previously known as "Preparation") - A mixture or solution composed of two or more substances
- 2) In accordance with Article 7 of Regulation (EC) No. 1907 / 2006 (REACH regulation) – Registration and notification of substances in articles, any producer or importer of articles shall notify ECHA, if a substance meeting the criteria in Article 57 and is identified in accordance with Article 59(1), if both (1) the substance is present in those articles in quantities totaling over 1 tonne per producer or importer per year & (2) the substance is present in those articles above a concentration of 0.1% weight by weight (w / w) are met. The information to be notified shall include (a) identity and contact details of the producer or importer, (b) the registration numbers, (c) the identity of the substance and (d) the classification of the substance, (e) a brief description of the use of the substance and (f) the tonnage range of the substance.
- 3) In accordance with Article 33 of Regulation (EC) No. 1907 / 2006 (REACH regulation) – Duty to communicate information on substances in articles, any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in concentration above 0.1% weight by weight (w / w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance. On request by a consumer the relevant information shall be provided by any supplier of an article free of charge, within 45 days of receipt of the request.

4) In accordance with Article 9(1)(i) of DIRECTIVE 2008/98/EC (Waste Framework Directive) – Companies supplying articles containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to ECHA through SCIP database, as from 5 January 2021.
